

Robotic Linear Filling Machine

Performance and Quality: We present the quality and high performance together thanks to the materials supplied from the brands that leader of it's sector

Fast and Easy Maintenance: Only one person is enough to fast, easy, and fully automatic usage of the machine thanks to the filling settings system on the touch screen.

Multi Format: You can have the most suitable format thanks to our wide – scale, the diameter changing depends on your request, and our flowmetric and volumetric systems depends on your product type.

Maximum Security: Maximum Security : Your safety is provided by plexiglass protection cabin frames and protection switches on the door during and after the filling.

Maximum Hygiene: When the sterilization of the machine is provided by Hepa filter, the inner cleaning of the machine after the filling is provided by the CIP system. The sterilization of the filling cups is provided by the UV Lamp unit. All the materials of the machine are stainless steel and the conformity of food is provided by materials have food conformity certificate.

MODEL	PDM Robotic Linear Filling Machine
Construction Material	Stainless Steel AISI 304 - 316
Package Type	Bucket, Cup
Product Range	Ayran, Ice Cream, Milk, Juice Types, Yoghurt, Fruit Yoghurt
Filling System	Flowmetric / Volumetric
Filling Range	Adjustable from Control Panel
Sterilization	Full Automatic CIP System and Closed Filling
Stations	Full Automatic Pneumatic and Mechanical with Servo Engine Systems
Lidding	Automatical
Qty of Lines	From 1 to 10 Lines or custom design
Options	Automatic
Production	Cup Burst Control Sensor System
Package Type	Custom Design for Client

AYRAN

ICE CREAM

JUICE

MILK

YOGHURT

FRUIT YOGHURT

FILLING LINE FOR:
 BUTTER MILK, YOGURT, AYRAN, ICE-CREAM, ALL TYPES OF JUICES, etc.
